Abstract (en)

[origin: JPH02191724A] PURPOSE: To rapidly replace flat bars by mutually engaging the outside of a belt with the ends of the flat bars in a complimentary shape. CONSTITUTION: Flat heads are easily produced and fitted without using other fitting materials such as bolts or the likes by binding the flat heads (longitudinal ends of flat bars 14', 14", 14''' and so forth) with a belt 16. The ends of flat bars are pulled forward on a slide guide 17 during driving and the flat heads are mildly overlapped on the belt when they travel back on the side opposite to the slide guide of a rotative flat, thus the flat bars are removable therefrom and replaced.
