Abstract (en)

A silver halide photographic paper, comprising a paper support coated on both sides with a polyolefin, and, provided thereon, light-sensitive layers comprising a red-sensitive silver halide emulsion layer, a green-sensitive silver halide emulsion layer, and a blue-sensitive silver halide emulsion layer, in this sequence from the support, wherein: the support has an average center surface roughness of not more than 1.0 μm ; and the light-sensitive layers have been obtained by coating solutions thereof on the support at a speed of not slower than 60 meter/minute.
