Abstract (en)

[origin: US4942694A] A fitting for doors, windows or the like, comprising locking means, in particular, a casement bolt or espagnolette lock, for locking the wing (9) against the fixed frame (11), and acting on hinged fittings consisting of a corner bearing (2) and a casement stay (3) disposed in rabbets, so that the said wing (9) can be opened at least inwardly and disposed in a ventilation position, this fitting moreover being provided with control means (21) for opening the wing (9), starting from the closed position, into the ventilation position, followed by inward opening of said wing, by acting successively on the locking means.
