Abstract (en)  
[origin: EP0362193A2] Plane element for sealing against the penetration of liquids and/or gases, in particular for the enclosure of dumps and for the insulation of structures, which has interconnected fabric webs and a filling introduced between these and in which it is envisaged that the two fabric webs (1) are fixed at a maximum distance areally by means of a continuous thread system (2) and the filling (3) consists of sealing wall compounds, preferably mineral, which are capable of swelling up. <IMAGE>
