Abstract (en)
[origin: EP0362481A2] In a boring ram having a percussion piston (2) which is axially moveable in a housing (1) and is controlled in its movement by a control tube (3) connected to a compressed-air hose (6) and mounted in an elastic intermediate piece (4) arranged in the housing (1), in which the elastic intermediate piece (4) is arranged on the control tube (3) and/or in the housing (1), assembly of the intermediate piece (4) is simplified. In addition, less damage occurs at the housing (1), control tube (3) and compressed-air hose (6), and the control tube (3) is also easier to assemble and dismantle. <IMAGE>
