Abstract (en)
[origin: EP0362831A2] A safety plug for discharge pipes, mainly for sanitary installations of new buildings or in refurbishments, consists of a rotationally symmetrical spigot (1), having a plurality of diametral steps (1a, 1b, 1c), which is designed as a hollow body which is closed on the end side (2) of the smallest diametral step (1c) and which preferably has the same wall thickness (s) in the region of each of the steps (1a, 1b, 1c), the mutual transitions (ü) between the steps (1a, 1b, 1c) extending chamfered, inclined or rounded. <IMAGE>
