Abstract (en)
[origin: EP0362977A2] A powder application apparatus comprises a powder container (10) in the form of bottle containing powder therein. The container (10) is elastically deformable by being squeezed at the sides (10a) thereof so that it discharges powder (8) together with air from an opening (16b) thereof. A brush portion (22) is mounted on the opening so that it surrounds the opening.
