Abstract (en)
Disclosed is a CRT socket comprising a housing, a focus connection contact and a focus spark-gap contact, these contacts along with other necessary contact being built in the housing, said focus connection contact having a press contact terminal, and said focus spark-gap contact having a first terminal to be press-fitted in the press contact of said focus connection contact and a second terminal to be connected to said high-voltage lead conductor. The focus connection contact can be mated with the focus spark-gap contact by press-fitting the first terminal of the focus spark-gap contact in the press-fit terminal of the focus connection contact, whether the CRT socket is of the soldering type or of the snap-in type.
