Abstract (en)
[origin: EP0364311A1] According to the invention, the spraying nozzle (16) which comprises ejection channels (40, 41) for shaping the jet, arranged to give the jet a flat fan shape, is shaped such that all the shaping air-ejection channels, to the exclusion of any other air-ejection channel, communicate with a same compressed-air distribution circuit (14, 20, 49). The other air-ejection channels can be supplied by a different compressed-air source. <IMAGE>
