Abstract (en)

[origin: EP0364363A1] The header box (6) and the expansion chamber (7) are separated from one another by a plane wall portion (18) exhibiting two apertures (8) communicating respectively with fluid inlet and outlet compartments. A monoblock connecting component comprises a cover (5) which obturates an aperture (20) of the expansion chamber, and two fluid inlet and outlet connections (2) passing through the cover (5) and exhibiting respective apertures (24) which coincide with the apertures (8) of the two chambers respectively. <IMAGE>
