Abstract (en)
[origin: JPH02217238A] PURPOSE: To obtain a composite fireproof and waterproof textile with excellent properties and less change with time by constituting an incombustible discontinuous adhesive layer between the first layer consisting of a needle-punched nonwoven fabric layer having a thermo-stable fiber basis and the second layer formed of an impermeable film with a number of steam-permeable microholes. CONSTITUTION: The first layer 1 of a nonwoven fabric prep. by needle punching of a thermostable fiber and the second layer formed of a film are bonded together by using an incombustible discontinuous adhesive layer 3. In addition, this second layer is impermeable to liq., but freely permeable to steam and carbonaceous gas.
