Abstract (en)
[origin: EP0364400A1] The boot is provided with blocks (13, 14), of oblong shape, which are mounted removably in vertical pockets (10, 12) provided on the inner boot (7). These blocks are arranged on each side of the Achilles tendon which has the effect of wedging the heel in the boot. The blocks can be replaced by thinner or thicker blocks. <IMAGE>
