Abstract (en)
[origin: EP0364974A2] Antenna support of the type which is adjustable in azimuth and elevation, comprising a mounting plate to which are fixed an antenna and a stock. This stock (31) comprises at least one upper half-collar (41) embracing the base piece (10) and whose arms (46) extend in the direction of the antenna, and one upper clamp (42) being fixed to the upper half-collar (41) in order to lock it to the base piece, one lower half-collar (43) embracing the base piece and whose arms (47) extend in the direction opposite to the antenna, and one lower clamp (44) being fixed to the lower half-collar (43) in order to lock it to the base piece, as well as two lateral uprights (45) extending over a certain distance parallel to the axis of the base piece and each joining, respectively, the end portion of an arm (46) of the upper half-collar (41) to the end portion located beneath the preceding one of the lower half-collar (43). <IMAGE>
