Abstract (en)

[origin: EP0365282A2] There is disclosed a silver halide color photographic light-sensitive material improving in preservability and processing stability, and capable of providing a dye image having excellent sharpness, said light-sensitive material comprising a support and provided thereon, a blue-sensitive silver halide emulsion layer, a green-sensitive silver halide emulsion layer, a red-sensitive silver halide emulsion layer, wherein said blue-sensitive silver halide emulsion layer comprises a single layer and contains a yellow coupler having a molecular weight of 250 to 700 per coupling site of said yellow coupler.
