Abstract (en)

[origin: EP0365348A2] A silver halide color light-sensitive material and a package thereof in a form of disposable camera. The light-sensitive material comprises a blue-sensitive, a green-sensitive and a red-sensitive silver halide emulsion layers provided on a support and at least one of the color-sensitive emulsion layers has a single-layer structure, wherein at least one of the silver halide emulsion layers has a single-layer structure and the emulsion layer having a single-layer structure comprises at least two kinds of silver halide grains differing in average grain size and contains a development inhibitor releasing (DIR) compound, and the exposure latitude of the silver halide emulsion layer with a single-layer structure is 3.0 or more.
