Abstract (en)

[origin: EP0365513A1] In a tanker vehicle serving especially as sludge suction vehicle having a tank (3) divided up by means of a water-permeable dividing wall (6) into a sludge space (7) and a water space (8), it being possible to connect said tank to the suction side of an air pump (11) and feed it with liquids or suspensions via a suction line (10) which leads into the sludge space (7), an oil separator (20) with feed pump (19) arranged in front of it is additionally mounted on the vehicle. The intake line (19) of the feed pump (20) can be connected optionally with a suction hose or an outlet (16), leading via a filter (15), of the water space (8). On the vehicle an additional oil tank (5) which can be fed from the oil separator (20) is provided which receives the separated oil. <IMAGE>
