Abstract (en)  
[origin: EP0366148A2] A card issuing apparatus comprising a convey path for a card, a conveying section (13, 14, SR) for moving the card along the convey path, a magnetic card reading/writing device (5) and a thermal printer (6) which are arranged on the convey path and sequentially subject the card to magnetical recording and printing, respectively. The card issuing apparatus further comprises a main processor (11) connected to receive boarding information, for converting the boarding information into control data for the magnetical recording and the printing, a memory section (15) for storing the control data supplied from the main processor (11), and a sub-processor (12) for causing each of the magnetic card reading/writing device (5) and the thermal printer (6) to process the card according to corresponding control data stored in the memory section (15) while the card passes through the magnetic card reading/writing device (5) and the thermal printer (6).
