Abstract (en)

The invention relates to the automatic opening and closing of shutters (1) or the like. The housing (4) actuates the rotary driving arm (13) which opens or closes the shutter by means of the slideway (17). The housings (7) are remote-controlled from a central unit controlling all the doors and windows of the building and furthermore coupled to a central alarm. The invention is used for the remote control of shutters, doors, main doorways and french windows of a building, with an incorporated central alarm. <IMAGE>

Abstract (fr)

L'invention concerne l'ouverture et la fermeture automatiques des volets (1), ou analogues. Le boîtier (4) actionne le bras moteur rotatif (13) qui, par la glissière (17), ouvre ou ferme le volet. Les boîtiers (7) sont télécommandés à partir d'une centrale contrôlant toutes les ouvertures du bâtiment et, par ailleurs, couplée à une centrale d'alarme. Application : télécommande des volets, portes-portails, portes-fenêtres d'un bâtiment, avec alarme centrale incorporée.
