Abstract (en)

[origin: EP0366628A1] The present invention relates to a steering column switch assembly (1), of modular type, which has been specifically designed for heavy duty motor vehicles, characterized in that it comprises a supporting body which can be associated with the steering column (3), under the steering wheel and to which modular blocs (4-6) are coupled for controlling the windshield wipers, lamps and direction signalling lamps. The modular blocs (4-6) are provided with respective control levers (13) which are accessible from the underside of the steering wheel (3) and can swing about axes which are substantially parallel to the steering column (3), control means being provided at the free ends of the levers (13) for providing instantaneous driving or controlling functions.
