Abstract (en)
[origin: WO8904286A1] A system for transporting cargo between a storage area and a cargo carrier. The system includes a bridge (13) and boom (15) spanning between the storage area and the cargo carrier. A first elevator (14) is located at one end of the bridge (13) proximate to the storage area. A second elevator (16) is located at the distal end of the boom (15) positionable relative to the cargo carrier. Trackways (20, 21, 22 and 23) along the bridge (13) and boom (15) interconnect the first and second elevators (14 and 16). Independent cars (24) are provided to carry the cargo. Each car (24) is movable on the first and second elevators (14 and 15) and further along the trackways (20, 21, 22 and 23).
