Abstract (en)
[origin: WO8910447A1] The use of very high molecular weight polymers which are substantially completely water soluble as flocculants in paper making improves drainage time without adversely affecting formation, even when used in high shear processes.

Abstract (fr)
L'utilisation de polymères de poids moléculaire très élevé et presque complètement solubles dans l'eau, comme flocculants dans la fabrication de papier, améliore le temps d'égouttage sans influencer désavantageusement sur la formation, même lorsqu'on les utilise dans des procédés à fort cisaillement.
