Abstract (en)
[origin: EP0367246A2] This specification discloses a method of observing information having the steps of converting a radiation beam into a visible harmonic beam conforming to the information, and observing the information by the harmonic beam. The specification also discloses an apparatus for observing information therethrough having means for producing a radiation beam conforming to the information, and means for converting the radiation beam into a visible harmonic beam, the information being observed with the aid of the harmonic beam. The specification further discloses a head-up display apparatus having means for producing a radiation beam conforming to information to be displayed, means for converting the radiation beam into a visible harmonic beam, and a beam combiner for receiving the harmonic beam and directing it in a predetermined direction to effect the display of the information by the harmonic beam.
