Abstract (en)
[origin: EP0367313A1] This invention relates to a post for fixing a netting-shaped fencing material that is provided with a bulge substantially extending in longitudinal direction that serves as bearing surface for the netting sheet to be fixed and for fixing the netting sheet in conjunction with several clamping means whereby each of the clamping means (1) consists of an elastically deformable piece that can grip round the bulge (7) of the post (2) taking up and clamping at least one wire part (4, 4 min) of the netting sheet (3) to be fixed.
