Abstract (en)
[origin: EP0367842A1] There is provided a screw-on handle assembly, in which there is a fixed predetermined distance between the axis of rotation (5) of the handle and the driver member (25) displacing the actuating rod guided displaceably in the rebate, whilst the actuating rod has driver pins on both sides, so that the assembly can be inserted without modification into leaves in which the guide for the actuating rod is at different distances from the axis of rotation of the assembly. <IMAGE>
