Abstract (en)  
[origin: EP0368072A1] The invention relates to a sleeve board (12) for ironing sleeves or the like, which can be swung up and particularly connected in an articulated manner to an ironing board (10) and which has a frame pivotable from its working position, in which it is arranged above the ironing board (10), into its position of rest, in which it is arranged underneath the ironing board (10) at a short distance from the latter, and back again. It possesses a frame leg (22) which is articulated on the sleeve board (12) and in the working position and position of rest respectively projects relative to the ironing board (10) and can be swung in towards the bottom of the sleeve board and which is articulated on the ironing board via a catch joint (24) immovably connectable to it at least in the working position. <IMAGE>
