Abstract (en)
[origin: EP0368709A2] The invention relates to an advertising panel with metal components, comprising a stand consisting of at least one post 1, and a framework provided with at least one beam 2. According to the invention, the beam 2 is above and on the stand and fixed to each post 1 by a fixing member 5 comprising a split collar provided with parallel clamping tabs and gripping the beam 2, and a connecting piece fitted into the post 1; the framework also comprises at least one stanchion 3 and one element 41, 42, 43 of a crossmember 4, both components arranged above and on the beam 2; each stanchion 3 is fixed to the beam 2 by another similar fixing member 5, the split collar of which grips the beam and the connecting piece of which is fitted into the stanchion 3; the crossmember element is placed and fixed on at least one support member 6 arranged on the collar and slipped around the stanchion 3. <IMAGE>
