Abstract (en)  
[origin: EP0368825A2] For each punch element pair (21A/22A etc.) the locator (40) has one gripping element (41A etc.) for receiving an electrical connection element (30). The gripping element(s) is(are) borne by a support member (41, 42) which can be displaced in a straight line between a standby position in which the gripping element(s) (41A etc.) is(are) located in the region between the opened jaws (21, 22) of the crimping tool (10) and a starting position in which they are located completely outside this region. <IMAGE>
