Abstract (en)

[origin: WO8900782A1] In a method of mounting a tight-fitting tube section or sleeve on a cable, the tube section/sleeve is internally provided with a plurality of slide rails, through which radial expansion may be effected during mounting, and through which the friction during mounting is reduced significantly. The rails are removed after the mounting.

Abstract (fr)

Dans un procédé de montage sur un câble d'un tronçon de tube ou manchon bien ajustés, le tronçon de tube/manchon comporte une pluralité de rails de glissement internes, au moyen desquels on peut effectuer une dilatation radiale et réduire de manière significative le frottement pendant le montage. On retire les rails après le montage.
