Abstract (en)
[origin: CA2002730A1] 23422-118 A formwork panel including edge profiles extending around its edges and stiffening girders which are disposed between the edge profiles and which serve to stiffen the forming surface, and, in spaced relationship to the edge profiles, tie points at or next to the stiffening girders. All the stiffening girders conform in outer cross-sectional shape, but the stiffening girder(s) proximate to the tie point are reinforced in order that the tension can be readily conducted into the formwork panel.
