Abstract (en)

A child-resistant screw closure can also be used for relatively large containers (10), which are common in the washing-agent and rinsing-agent sector, if a press-in zone (18) to be pressed in radially to release the child-resistant arrangement is part of a tipping cheek (3) which is pivotable about a tipping axis (4) which runs approximately tangentially in relation to the screwing axis (6) of the screw cap (1) (Fig. 2). <IMAGE>

Abstract (de)

Ein kindergesicherter Schraubverschluß wird auch für relativ große, in der Wasch- und Spülmittelbranche übliche Behälter (10) handhabbar, wenn eine zum Entarretieren der Kindersicherung radial einzudrückende Einpreßzone (18) Teil einer um eine etwa tangential in Bezug auf die Schraubachse (6) der Schraubkappe (1) verlaufende Kippachse (4) schwenkbaren Kippwange (3) ist (Fig. 2).
