Abstract (en)

[origin: EP0369218A1] A cable connector for an insulated cable in the low-voltage range contains a laterally bendable element with a slit (21) which, when the element is bent over, engages with the insulated end of the cable in such a way that the cable is pushed laterally into the slit (21), the edges (23) of the slit (21) thereby cutting through the insulation of the cable. <IMAGE>
