Abstract (en)

[origin: EP0369486A2] In a silver halide color photographic light-sensitive material which comprises a photographic layer having at least one silver halide emulsion layer on a support, fine silver halide grains having an average grain size of less than 0.15 μm , adsorbing a compound for forming a silver salt having a solubility lower than that of silver bromide thereon, and having a silver chloride content of 50 mol% or more are contained in the photographic layer.
