Abstract (en)

[origin: EP0369970A2] The invention relates to a brake mechanism, and particularly a brake mechanism for a treatment bench or the like of the kind comprising a part (2) which is pivotal in relation to a rigid frame (1). The brake mechanism includes a plate or disc (7) which is attached to the pivotal part (2) and which can be pivoted in relation to the frame (1), together with the pivotal part (2). Also attached to the stationary frame (1) is a brake lining (8) which is intended to be brought into contact with the plate or disc (7) such as to brake the pivotal part (2).
