Abstract (en)

The invention relates to the production of high-strength seamless steel pipes from starting blocks of specific composition which, after heating to 1,150-1,280 DEG C, are rolled out to form pipes and are then subjected to a defined heat treatment. <IMAGE>

Abstract (de)

Die Erfindung betrifft die Herstellung hochfester nahtloser Stahlrohre aus Einsatzblöcken bestimmter Zusammensetzung, die nach Erwärmung auf 1150 - 1280<o>C zu Rohren ausgewalzt werden und danach eine definierte Warmbehandlung durchlaufen.
