Abstract (en)

[origin: EP0371900A1] The present invention relates to a conveyor in an installation for electrocoating motor vehicle bodies. This conveyor consists of an overhead carrier device consisting of two parallel overhead carrier rails 1a, 1b, of a metal sledge 2 and of four supporting arms 3a, 3b connecting the sledge 2 to the two carrier rails 1a, 1b. The invention is used for conducting electricity from an electrified rail 1a to the sledge 2 in an electrocoating installation. <IMAGE>
