Abstract (en)

There is disclosed transformable configuration field hospital, adapted to be transported by aircrafts and road vehicles, which comprises a low central body (2) and a top central body (3) to be telescopically engaged. Between these central bodies side lower bodies (10a, 10b) and side top bodies (11a, 11b) can be housed which can be withdrawn in the inside of the central bodies (2, 3) during the transportation and extended, in the use condition, from the central bodies (2, 3) so as to be arranged in an adjoining relationship with respect to the central bodies themselves.
