Abstract (en)
[origin: EP0372253A2] In a printing machine having an impression cylinder (3) which interacts with at least one transfer cylinder (4) transferring an image onto a material to be printed on (6, 7), a good production quality and user friendliness can be achieved by the fact that the circumference at least of the impression cylinder (3) is wipeable by means of at least one wiper device (8) containing a wiper cloth (9) which can be dampened, said wiper device being arranged in the region of a section of the circumference which is not wrapped by the printed material (6, 7). <IMAGE>
