Abstract (en)  
[origin: EP0372883A2] A headphone device designed to cooperate with the concha of the auditory meatus of the human ear. The headphone device includes a housing (51) containing a speaker, a projection (53) extending from the housing (51) and fitting into the concha of the human ear, an opening (54) formed in the projection (53) at a location facing towards the auditory meatus of the human ear and a headband (41) for supporting the housing (51) in proximity to the human ear.
