Abstract (en)

[origin: EP0373546A2] Triacylated ethanolamines of the formula (RCO)(R1CO)N-(CH2)2-OCOR2 in which R, R1 and R2 are identical or different and are alkyl, alkenyl or aryl groups, and the total of all C atoms in the molecule is 8 to 14, are liquid and readily miscible with water. By reason of these properties they are very suitable as peroxide activators in liquid detergents and cleaners.
