Abstract (en)
[origin: EP0373706A2] A radiant heating element for cooking devices having a cooking plate constructed in particular as a glass ceramic plate has preferably two halogen lamps to which in each case a reflector is assigned, each reflector having a bending edge rising in the direction of the halogen lamp, which bending edge, according to the invention, is bent outwards in a circular arc shape extending in a plane parallel to the cooker plate, the projection of a halogen lamp producing two intersection points with the projection of the bending line onto the cooker plate. <IMAGE>
