Abstract (en)
[origin: EP0373727A1] A clip for attachment of flat boards on thin walled profiles is disclosed, which clip comprises an outer strip (1) and an inner strip (2), mutually connected by a folded back (3). The inner strip (2) is provided with a cam. By the spring force of the folded back (3), the cam is urged towards the outer strip (1), allowing the clip to be attached to a thin walled profile. In the inner strip (2) two U-shaped cuts (8,9) have been provided. In the outer strip (1) two cuts 12, 13) have been provided, which are folded so that the attaching lips (14, 15) for the plates to be attached are provided. These plates are to be located between the lips (14, 15) and the outer strip (1).
