Abstract (en)
[origin: EP0373806A2] A strap assembly is provided for a timepiece such as a wristwatch (2) having one, and preferably two, strap portions (1 and 9) each attachable at one end to the timepiece or watch (2). The or each strap portion (1, 9) has a pair of superimposed spaced apart outer face parts (5,6, 10,11) connected together around their edges to define there between a sealed chamber (7) containing a fluid with decorative and/or therapeutic effects. At least one of the outer face parts (5, 6, 10 ,11) has an area (5a, 10a) which is made of transparent material to allow the fluid in the chamber (7) to be visible therethrough from the exterior of the assembly. Adjustable buckle (13) and clip (14) means are provided for interconnecting the free ends of two strap portions (1 and 9) and for varying the length of at least one of the strap portions (1).
