Abstract (en)  
[origin: EP0374049A1] Dispenser and applicator with a manual closure, comprising a plug (3) connected to the neck (2) of a receptacle (1) and provided with a closing finger (9) which leaves free outflow apertures (8) and controls the passage of a ring (14) leading to a dispenser (16) of a product contained in the receptacle (1) and brought to an applicator member (24), characterised by a bush (10) arranged around the neck (2) and movable axially, the said bush comprising a ring (14) for cooperating with the closing finger (9) and at least one button (17) which projects through an aperture (18) of the dispenser (16) fixed to the receptacle (1), the said button (17) being guided axially through the aperture (18) in which it slides in order to displace the bush (10) axially. <IMAGE>
