Abstract (en)

The present invention relates to an automatic parking apparatus with means for storing and automatically removing vehicles, characterized in that the apparatus comprises a fixed structure (1) including a plurality of compartments (2) for housing vehicles, communicating with a zone therethrough a lifting cab or platform (10) can be vertically displaced, the lifting platform having a top platform member (11) for removably supporting a vehicle (A) arranged on a carriage (20), and a lower or bottom platform member (12) for supporting an empty carriage (20'). On the lifting cab there are moreover provided means (30, 31, 32) for longitudinally displacing the carriage (20) and vehicle (A) supported thereon, as well as the empty carriage (20'), in order to selectively remove a vehicle from a compartment or arrange another vehicle in another compartment.
