Abstract (en)  
The suspended umbrella (5) is suspended on a hooked- claw type articulated cup (9) at the end of the extension arm (1). The position of the umbrella (5) can be adjusted by rotating a rotary handle (47). The rotary handle (47) is connected by the thread (27) to the articulated head (13) and stresses the latter against the pressure plate (11), by which means the articulated cup (9) is clamped firmly on the extension arm (1). <IMAGE>

Abstract (de)  
Der Hängeschirm (5) ist an einer klauenhakenartigen Gelenkpfanne (9) am Ende des Auslegers (1) aufgehängt. Die Lage des Schirms (5) kann durch Drehen an einem Drehgriff (47) eingestellt werden. Der Drehgriff (47) wird durch das Gewinde (27) mit dem Gelenkkopf (13) verbunden und spannt letzteren gegen die Anpressplatte (11), wodurch die Gelenkpfanne (9) am Ausleger (1) festgeklemmt wird.
