Abstract (en)

[origin: EP0374572A2] A mounting frame (10) for a cathode/control arrangement (14) has bores into which securing pins (12) are inserted. The mounting frame is one which is present in any case, and which bears a cam plate arrangement (16). As a result of the fact that the mounting frame which is present in any case is used and not a separate securing arrangement, as hitherto, the overall structure of the cathode/control arrangement is particularly simple. <IMAGE>
