Abstract (en)

[origin: EP0374992A1] An effect yarn for producing an elastic sheet material comprises a cotextured underdrawn polyester filament and an overdrawn polyamide filament having a load-bearing strength of around 50 cN/tex. To prepare the effect yarn, a polyester POY yarn and a polyamide POY yarn are drawn simultaneously and to the same draw ratio in a drawing zone upstream of a texturing zone. The effect yarn is used for producing a two-coloured elastic sheet material. <IMAGE>
