Abstract (en)
[origin: EP0375369A2] A laminating blanket comprising a structure woven from polyether-ether-ketone monofilament yarns and having a silicone rubber coating at the support surface thereof. The woven structure being heat set prior to application of the coating and the coating embodying additives to provide enhanced thermal transmission, heat capacity, anti-static or other requisite characteristics. A needled batt may be provided between the coating layer and woven structure.
