Abstract (en)

[origin: EP0375542A1] The reflector of waves comprises a curved rigid support (10) provided with a convex front face covered with a thermally insulating paint (12), a metal gauze (22) able to reflect the electromagnetic waves and covering the paint (12), fixing means (24) of the "Velcro TM " strip type fixed onto the rear face (20a) of the support ensuring the holding of the gauze onto the support and a thermal super-insulation (35) situated over the whole rear face of the support, retained by adhesive polyimide tabs (34). <IMAGE>
