Abstract (en)  
[origin: EP0375563A1] The invention relates to an edge strip (1) intended for glass packing strips (5) with a view to immobilising them on the stored glass sheets. This edge strip (1) consists of multilayer corrugated board, the said edge strip being secured, by means of adhesive bonding of the rapid setting type, to the said insert strip (5), and for example by a so-called hot melt adhesive having a rapid setting time (a few seconds), to be applied hot, the corrugations of the board being oriented parallel to the strip. <IMAGE>
